# Inspiring people to connect with nature...

This brand style guide is designed to help us inspire people to connect with the work we do and the wildlife and wild spaces we look after by:

**Being audience centric and putting the nature experience centre stage**, using photography and illustrations to show what it feels like to engage with the city's nature and London Wildlife Trust - whether that's supporting us, visiting our sites or volunteering with us across a variety of activities.

**Talking in an engaging and inviting way** with the confidence of our expertise, using conversational style that captures our audience's interest while remaining informative and enlightening.

**Increasing our support** by taking opportunities to explain what we need. Encouraging our audience to find out more about what we do, why we do it, and how they can help.

**Creating a greater awareness** of London Wildlife Trust by using the branding in a consistent way that is instantly recognisable.

**Using a bold, paired back, visual lexicon.** Combining vibrant colours and clean layouts with bold, friendly typography to create an inviting personality, that encourages our audience to visit us, get involved or find out more.

This document sets out our brand guidelines, alongside a resource toolkit which contains various templates and files to help you get started and bring our brand to life.

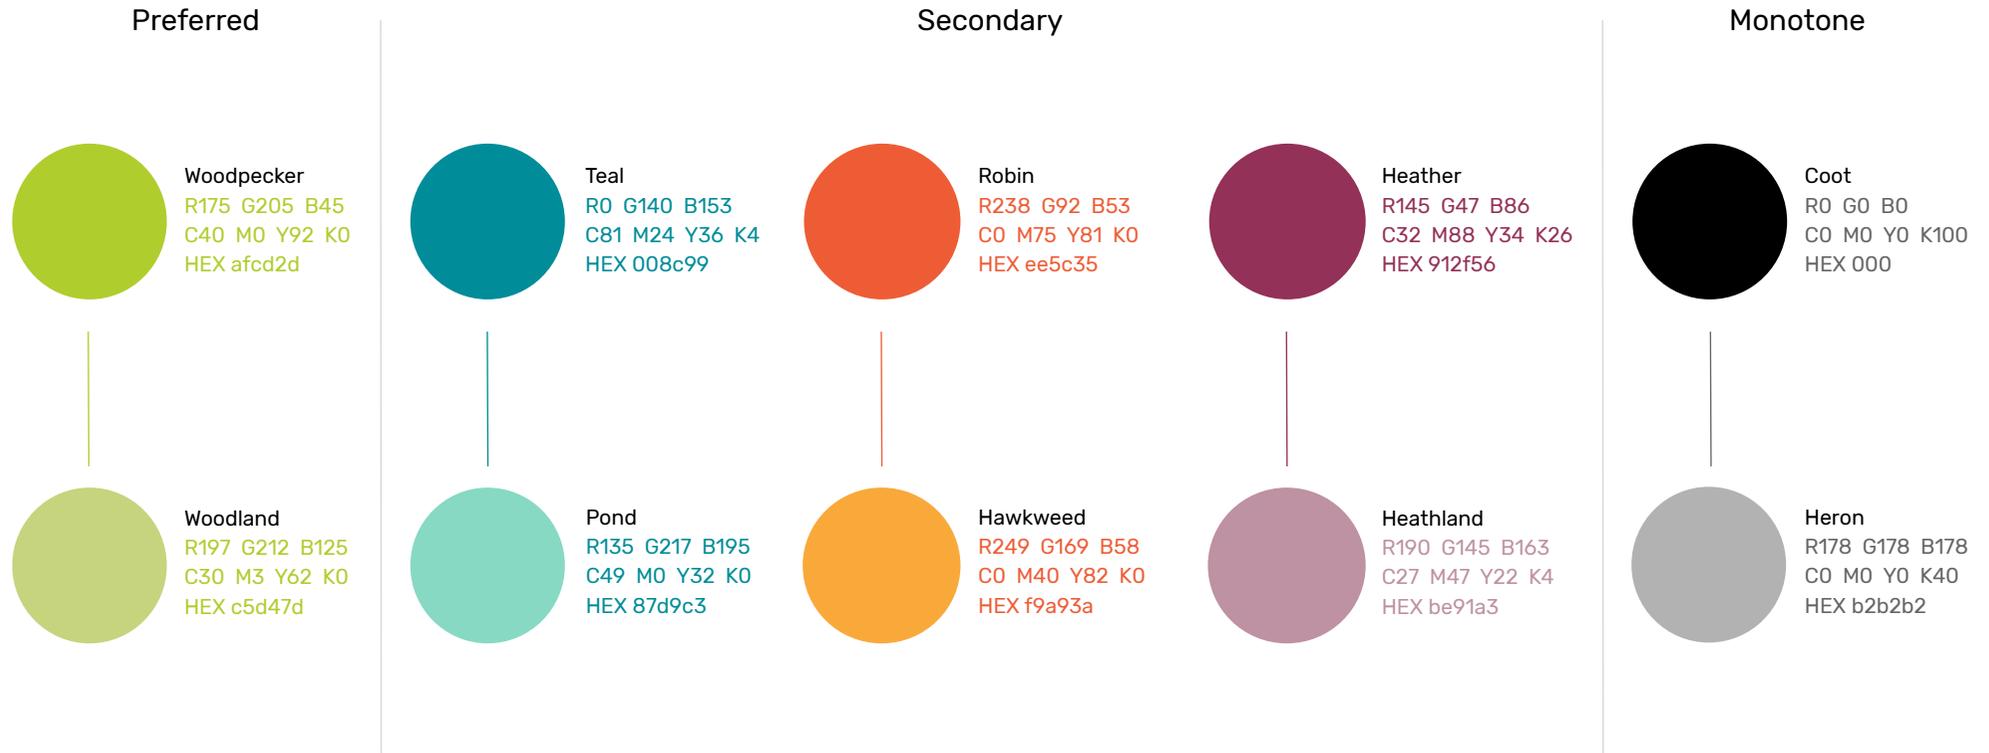

For any help in implementing the guidance within this document, please **get in touch**, we are more than happy to help.

**Colours**

# Brand Colour Palette

Here are our colours. They are bold and vibrant and are the first consideration when adding colour to design elements.

Woodpecker is the preferred brand colour, with Teal and Robin as alternative secondary options.

A second set of supporting colours are available to use. They are more subdued and designed to work in pairs with the main palette.

**Logos**

# Portrait Logos

**LWT Logo. Positive**

This is the primary logo, using a container box. It can be placed over any colour or image.

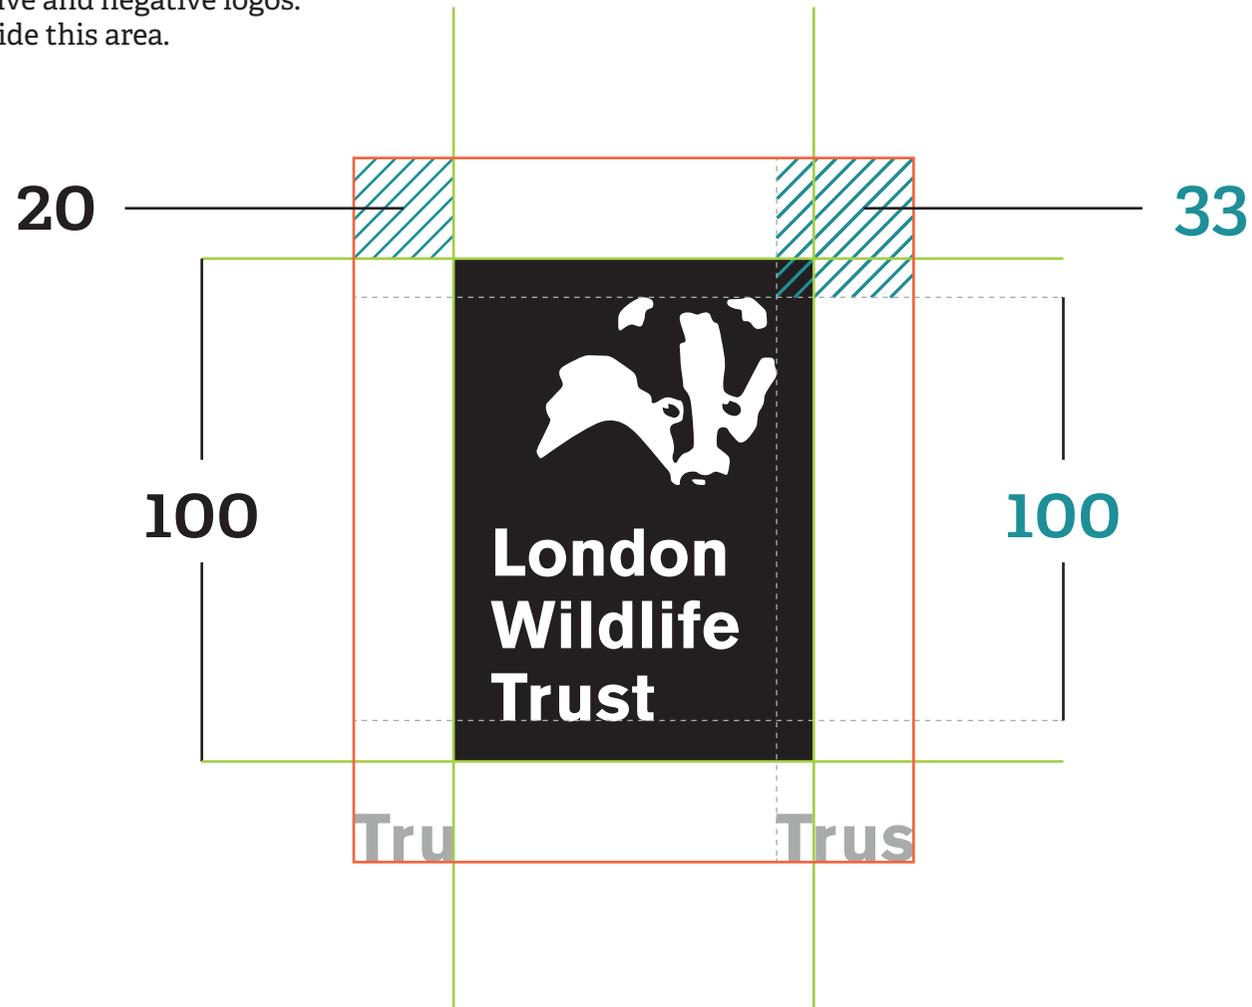

**LWT Logo. Reversed**

A white-out version, without the container box, can be used on the 4 colours from the primary palette.

# Portrait Safe Areas

The safe area (LWT Robin Red) is in the same position for both the positive and negative logos. No elements should sit inside this area.

Positive logo:  
20% of the container height or letters 'Tru'.

Reversed logo:  
33% of the logo height or letters 'Trus'.

# Landscape Logos

## LWT Landscape Logo. Positive

An alternative logo, using the container box.  
It can be placed over any colour or image.

## LWT Landscape Logo. Reversed

This logo can also work without the  
container box, and can be used on the 4  
colours from the primary palette.

# Landscape Safe Areas

The safe area (LWT Robin Red) is in the same position for both the positive and negative logos. No elements should sit inside this area.

Positive logo:  
36% of the container height or letters 'Tru'.

Reversed logo:  
50% of the logo height or letters 'Trus'.

# Alternative Logo

## LWT Alternative Logo. Positive

This version can be used when greater legibility of text is needed, such as smaller logo sizes in print.

## LWT Alternative Logo. Reversed

A white-out version, without the container box, can be used on the 4 colours from the primary palette.

# Alternative Safe Areas

The safe area (LWT Robin Red) is in the same position for both the positive and negative logos. No elements should sit inside this area.

Positive logo:  
36% of the container height or letters 'Wi'.

Reversed logo:  
50% of the logo height or letters 'ildi'.

# Partnership Logos

There are two options for partnership logos. Both are structured using our 20% safe zone block. They can be aligned centrally, or to the baseline of the logo when incorporating the 'In Partnership With' text.

Coloured logos are fine to use, but where possible - **monotone versions are preferred as they detract less from the LWT logo.** Logos should be 60% the height of the container, as depicted by the grey dotted lines.

# Strapline

Our strapline can be used alongside the positive, portrait and landscape logos.

## Centred:

Protecting London's  
wildlife for the future

## Justified left:

Protecting  
London's  
wildlife for  
the future

Protecting London's  
wildlife for the future

A text only version exists in 4 layouts, and uses the main brand font Adelle SemiBold.

## 1 line:

Protecting London's wildlife for the future

## 2 lines centred:

Protecting London's  
wildlife for the future

## 2 lines justified left:

Protecting London's  
wildlife for the future

## 4 lines justified left:

Protecting  
London's  
wildlife for  
the future

# A4 Sizing

On A4 layouts, partnership logos are to sit bottom left whenever possible.

On both portrait and landscape formats, the minimum size for the LWT logo is 18mm high, with a 10mm margin from the papers edge on both sides.

In partnership with

# Typography

# For Designers

Our main brand font is Adelle. It is to be used by designers for all official communications.  
[Please check licensing conditions.](#)

## Font: Adelle

ABCDEFGHI  
JKLMNOPQRS  
TUVWXYZ

abcdefghijklmnopqrstuvwxyz  
0123456789 - !@£%&\*)

# For Staff

Bitter is an OFL alternative (Open Font License) to the brand font, to be used by London Wildlife Trust staff for internal communications only. Such as on-site posters and notices.

## Font: Bitter

ABCDEFGHI  
JKLMNOPQRS  
TUVWXYZ

abcdefghijklmnopqrstuvwxyz  
0123456789 - !@£%&\*)

# For Designers and Staff

Rubik (also an OFL Font) is our supporting font to be used for captions and photo credits, and can be used by everyone across all outputs.

## Font: Rubik

Body Small Caption <b>Small Caption</b>	11 pt	13 pt	Adelle Regular Rubik Regular Rubik Medium
Mini Caption	9 pt	11 pt	Rubik Regular
Photo Credit	6 pt	7 pt	Rubik light

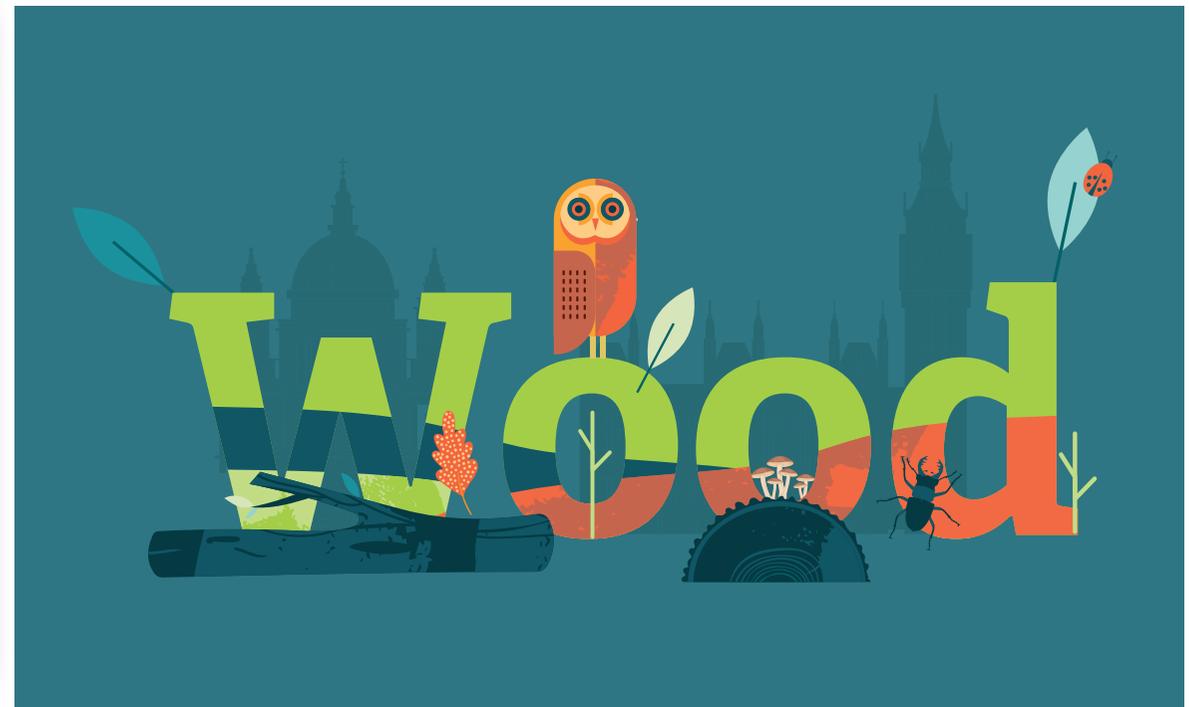

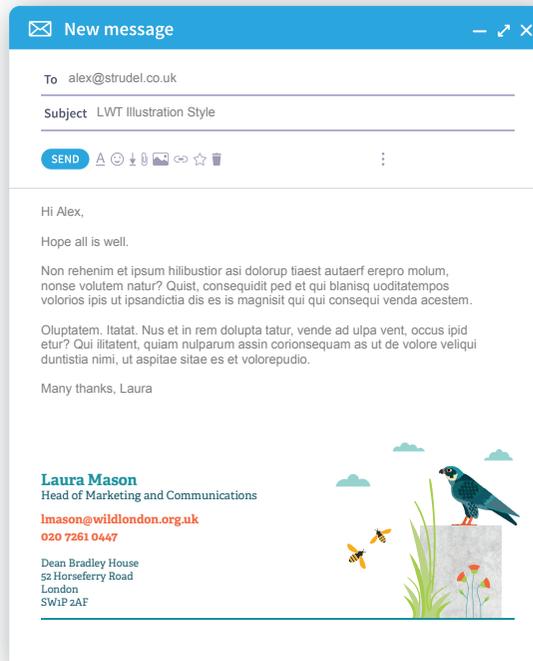

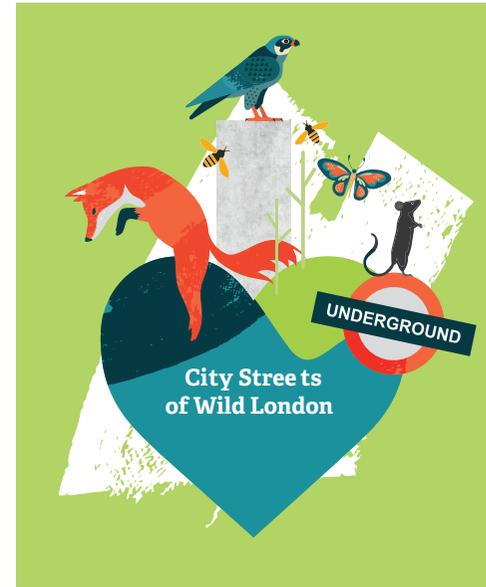

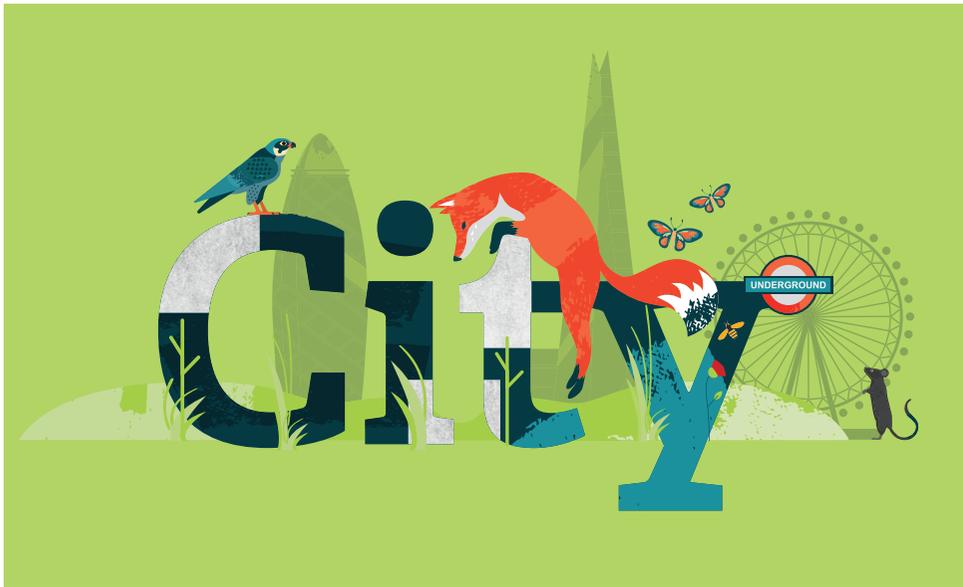

# Illustrations

We are working on a set of themed graphic illustrations that can be used to complement design work. These will be formatted for use in assets like powerpoint presentations where they can be used alongside a photographic approach.

These will be themed around waterways, woodlands, meadows and the city. We will update with more progress on this as we go.

If you need illustration work for a particular project, please get in touch and we can help put together a brief.

# Photography

# Photography

**Photography is key when creating emotive communications that are meant to engage and motivate people into action.**

A great image will go a long way to helping your designs stand out and have the desired impact.

It can also be a powerful way of getting your message across, without needing to use copy to explain in detail.

## Choosing an image

Images that have authenticity resonant more with our audience. Capturing real-life, enjoyable, experiences at one of our reserves allows people to imagine themselves in a similar situation, which in turn helps to inspire them to support and participate.

When choosing photos for your project, it is important to consider the following statements:

Inspiring a diverse range of people to connect with nature

Placing the person-nature experience centre-stage

Illuminating the value of London's wildlife and wild spaces

Marsden road frog @ Penny Dixie

© Paul Hobson

© Penny Dixie

© David Tramontin

These sort of images won't always be the best fit – for example as when species or venues need to be shown, or when using portraits for PR purposes.

It is fine, in these circumstances, to deviate from the 'audience experience' concept. However, the same sensibilities of using natural, real-life situations should be adopted wherever possible and avoid posed photos.

Remember to ask yourself:

**If the photo shows a group of people, is it a diverse group?**

**Does the image evoke an experience or feeling and does that match what you want to say?**

**Are there people in the photo, and should there be?**

**Is this the appropriate species or habitat?**

In our written communication it's good to keep things as concise and accessible as possible. Using images to convey meaning, or in addition to text, can bring much more meaning to our audience. For example:

**“Our volunteer community is made up of a diverse range of people, from nature novices to ecology experts, individuals from all backgrounds, experience levels and interests are welcome.”**

Vs

Always be aware that images may need the appropriate credits. These are placed 5mm in from the photo edge on either the left or right side and read downwards.

They are set in Rubik Light at 6pt as below:

Marsden road frog © Penny Dixie / © Penny Dixie

The © Symbol can be accessed via:

PC: Hold down “ALT” and type “0169” on the numeric keypad.  
Mac: Hold down “Option” and press “g” key on the keyboard.

# Image Sources

## Internal online

There is a London Wildlife Trust image bank resource containing some great photography from various sources within the Trust for you to use.

The Wildlife Trust's WildNet image library is also a good resource for high quality images, such as those you might want to include when utilising the poster templates included as part of this brand guide.

[View Image Bank](#)

[View WildNet Images](#)

## Sharing your own photos

Our use of images can be roughly split into two categories: very high quality, professionally captured 'evergreen' images which will be stored on the image library and used in print, as banners on the website, shared with the media.

The other category includes a much wider variety of 'snaps' which won't be stored long-term but will be used primarily on social media accounts to document events and wildlife spots, and the majority of images we receive from staff will fall into this – no less important – category.

Here are a few tips to help you take a great photo:

- 1 Take photos as landscapes rather than portraits.
- 2 If there is bright sunlight, take the photo with your back to the sun.
- 3 Don't use filters – let the camera use natural light and use flashlight for night-time only.

To share your images, send them to the Marketing and Comms team along with any supporting information – eg funder thanks, social media text – and it will either be saved temporarily on Teams (social media use) or uploaded to the London Wildlife Trust image library (evergreen, high quality content).

## External online

Alternatively there are some great websites out there that offer royalty free images at no cost, or with no commercial restrictions.

Here are a few suggestions to try:

[unsplash.com](https://unsplash.com) - [pexels.com](https://pexels.com) - [picsfree.com](https://picsfree.com)

## New commissions

There won't always be a photo that exactly shows what you want to portray and we're aware that our photography bank is far from covering every eventuality. If there's any imagery that you feel would be helpful to have that you can't find, let the marketing and comms team know, we'll likely be able to find you a work around. If we get enough requests for something, we can commission new photography.

## A note on artistic licence

If you need to, it's ok to use some artistic licence. For example, the photo to the right is taken at West Kent Golf Course. It could also be used for a piece promoting volunteering at Hutchison's Bank as there's nothing too specific in the photo (and remember, an external audience won't notice the level of detail that we do internally.)

This won't apply in every situation. If you know that you're writing for an audience with a very specific knowledge base and interest then you'll need to be more accurate. If you're writing for a new audience who don't know much about what we do yet, then being engaging might be more important than being detailed and accurate.

# Posters

# Basic Example Templates

You now have access to the toolkit assets that will allow you to produce your own posters and communications.

A collection of basic A4 templates are available for you to download and populate with your own content, specific to your project.

This can be done using the blank templates or the pre-existing ones, that have content in place for you to change to suit your needs.

## Wildlife in Water at Crane Park Island

Thursday 16th April 10am – 12.30pm  
Meeting point: the Shot Tower in Crane Park

Join us for a fun and creative two-hour family learning workshop where we'll use nets to look in the pond and river and discover the aquatic animals that live at Crane Park Island! This workshop is for Richmond Borough residents only.

To book please email [amarch@wildlondon.org.uk](mailto:amarch@wildlondon.org.uk)

 Protecting London's wildlife for the future

For lower income families and those receiving benefits, entry is free. Donations are gratefully received from those to which that does not apply.

Charity 283895

## Kidbrooke Conservation Volunteering

Every Saturday 10am – 4pm  
Meeting point: the Hub, 3 Pegler Square, SE3 9DL

Are you interested in learning new skills, meeting new people and offering your time to make a difference for nature in Kidbrooke?

Join London Wildlife Trusts Volunteer Officer Fay Smith to help with practical habitat management and wildlife surveying in your local area!

This is a fantastic opportunity to learn to use traditional tools and improve your wildlife identification skills. No experience is necessary and full training will be provided. Please wear suitable footwear.

Age: 18+ (16-18 year olds with parental permission welcome)

 Protecting London's wildlife for the future

To sign up for these sessions contact Fay on: [fsmith@wildlondon.org.uk](mailto:fsmith@wildlondon.org.uk) or call 0770 671068

Charity 283895

## Community Clean up day

Saturday 21st March 10am – 12.30pm

Are you interested in cleaning up the local area, meeting new people and offering your time to make a difference for nature in Kidbrooke? Everyone Welcome!

Join our London Wildlife Trusts Volunteer Officer Fay Smith and explore Cator Park, Sutcliffe Park and Bird Brooke Nature Reserve while also keeping it clean for people and wildlife.

This is a fantastic opportunity to give back while being a part of Keep Britain Tidy Spring Clean Campaign.

No experience is necessary and a full briefing will be provided.  
Please wear suitable footwear.  
Children must be accompanied by their parents.

 Protecting London's wildlife for the future

If you'd like to sign up for these sessions get in touch with Fay Smith by Friday 13th March via: [fsmith@wildlondon.org.uk](mailto:fsmith@wildlondon.org.uk) or call 07770 671068

Charity 283895

# Advanced Example Templates

Alongside these, is a more advanced set of templates, which takes into account full bleed imagery for professional printing. These are starting points and inspiration as to what is possible when applying the rules of this guide.

You may want to start with a totally blank page and go wild, or amend an existing poster that has been created in the past. Whatever your requirements the advanced templates will cover your needs.

## Winter venue hire at the Coal House

The Grade II listed Coal House hosts:

- Up to 80 guests for a standing reception
- Up to 40 guests for a seated dinner
- Up to 150 guests for dining and celebration with added outdoor structures.

The Coal House operates a fully stocked bar including a selection of responsibly sourced wines, beers, soft drinks and a range of quality spirits.

Catering for the occasion can be selected from our in house canape menu; or for formal dining, from experienced caterers on our approved list of suppliers, available on request.

Charity 283895

If you are looking for somewhere extra special to celebrate in style with friends and family; the Coal House at Woodberry Wetlands, with a unique location overlooking the reservoir, makes for a true winter wonderland venue.

For selected remaining dates up to March 2020 we are able to offer reduced venue hire, from £1080, plus a free sparkling drinks reception.

Contact: [events@woodberrywetlands.org.uk](mailto:events@woodberrywetlands.org.uk) for more information, including availability and pricing.

## Volunteer with us and help wildlife across London

Whether you're a nature novice or an ecology expert; everyone is welcome to get involved.

Volunteering with us will give you new skills and experience, learning from qualified professionals.

There are lots of different ways to get actively involved with London Wildlife Trust, from regular workdays to one-off events, in locations across the capital.

If you'd like to get involved, contact London Wildlife Trust to find out more: [wildlondon.org.uk/volunteer](http://wildlondon.org.uk/volunteer) or call 020 7261 0447

Charity 283895

Protecting London's wildlife for the future

# Grid Structure Portrait

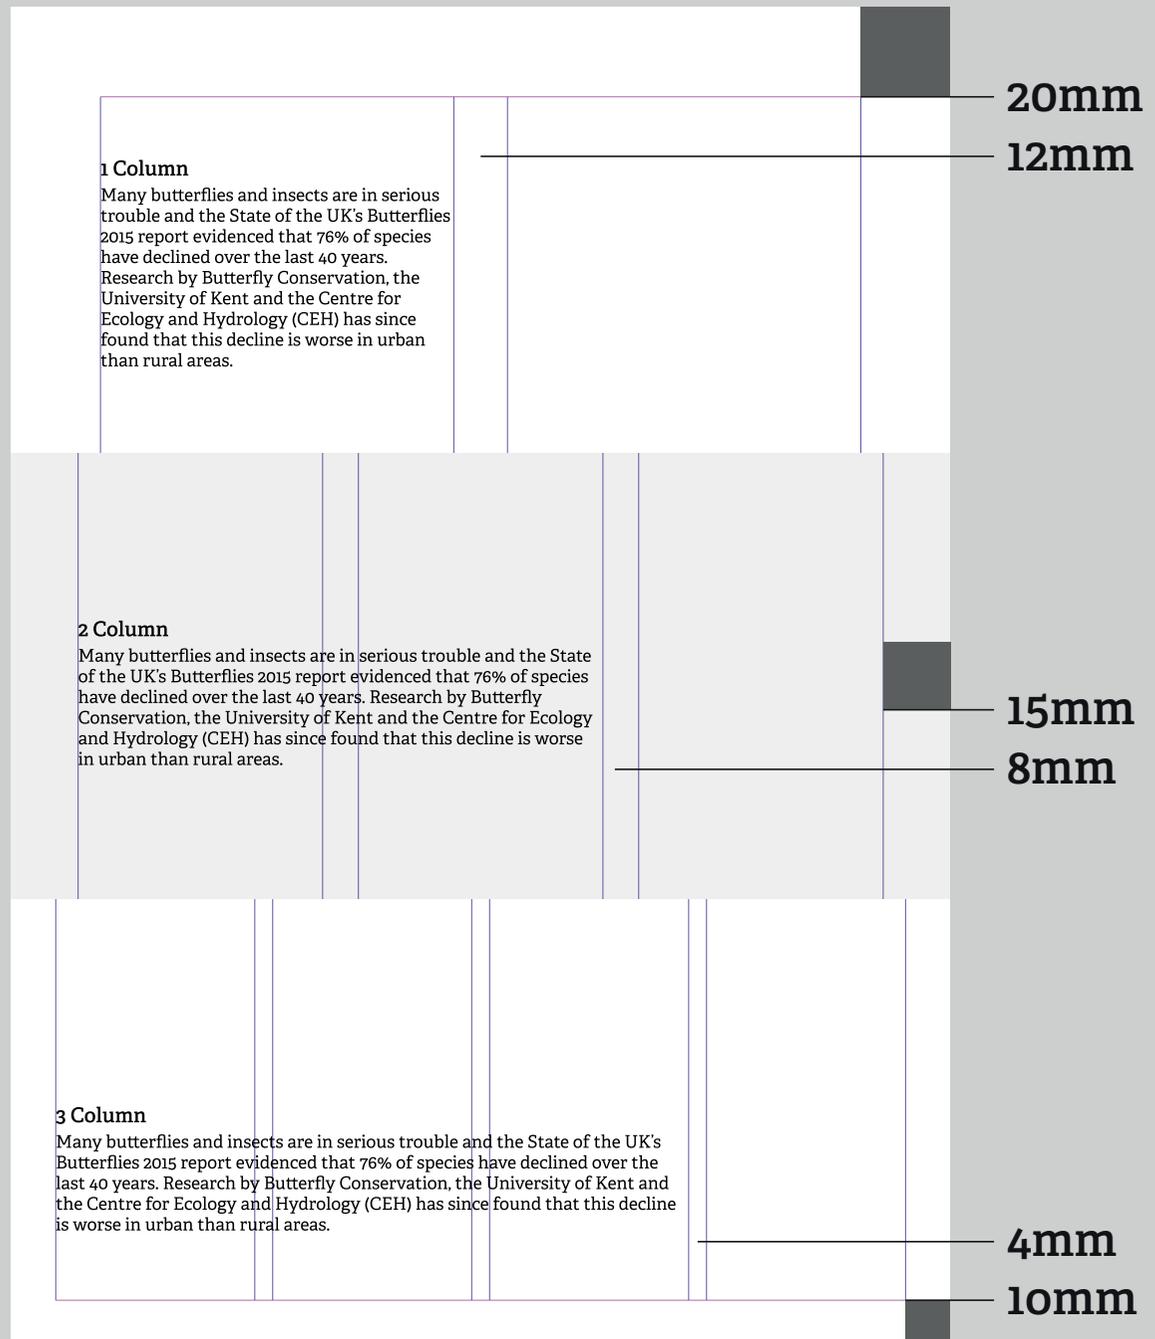

There are 3 grid styles to choose from. They are starting points to help structure your design and to accommodate a variety of different content possibilities from bold, hero posters to more detailed designs containing larger amounts of written copy.

It is fine to use more than 1 grid structure per poster, and will often be necessary to accommodate a variety of elements such as; headings, sub text, key images, partnership logos and body copy.

They and are supplied as Microsoft Word documents for use by internal staff and Adobe InDesign documents for external designers.

## Portrait Grid Rules

Columns	Margin	Gutter
2	20mm	12mm
3	15mm	8mm
4	10mm	4mm

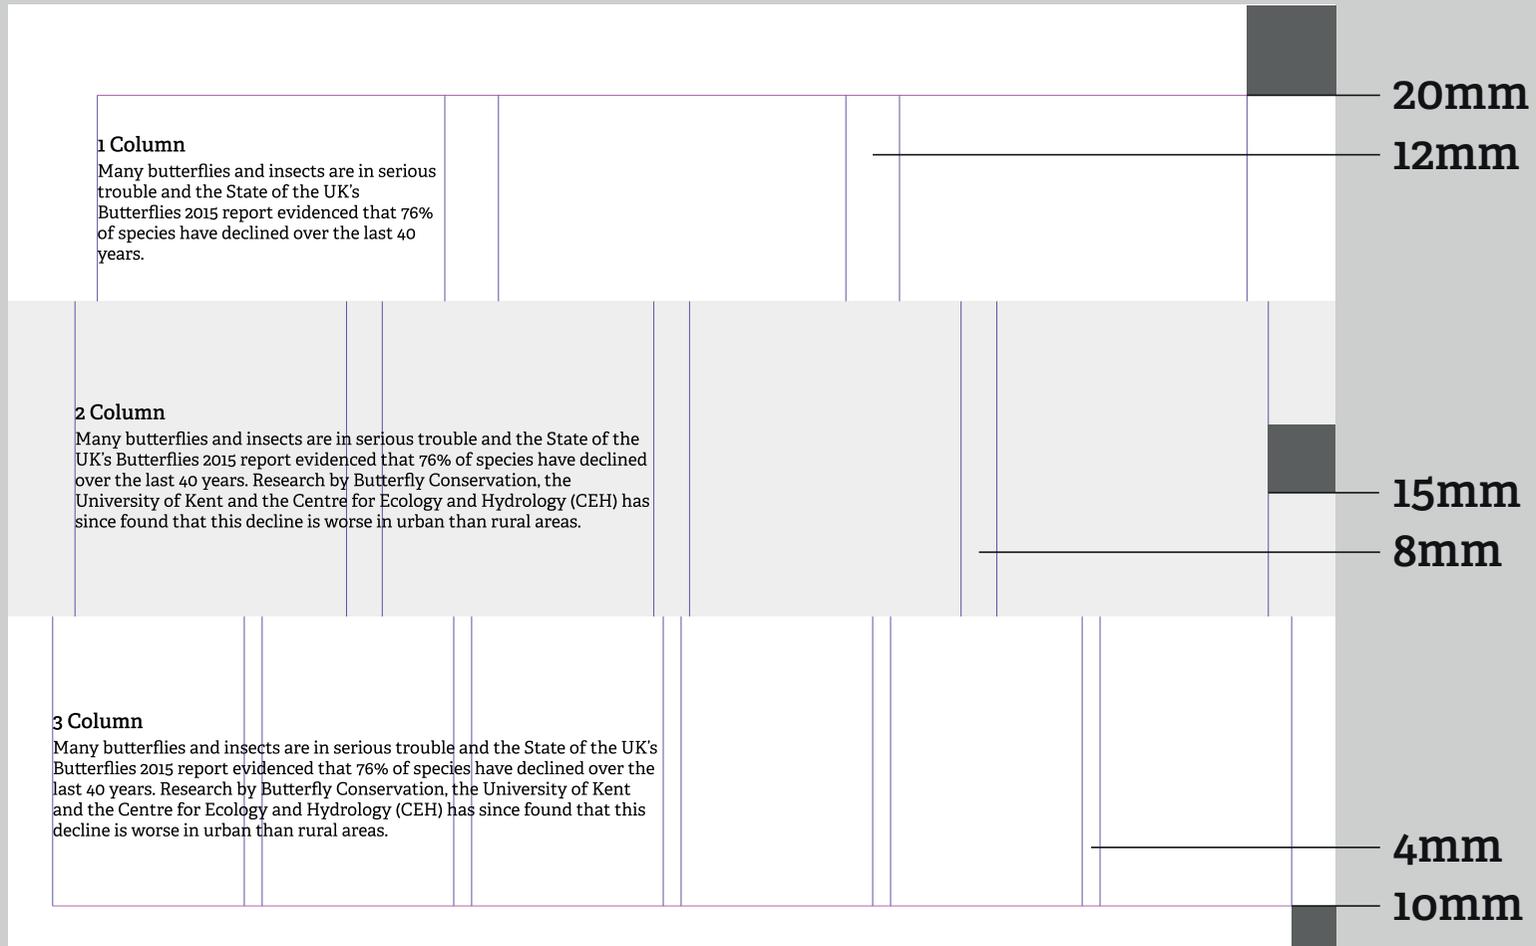

# Grid Structure Landscape

There are also 3 grid styles for landscape format. Again it is fine to use more than 1 grid structure per poster to accommodate your needs.

They are supplied as Microsoft Word for use by internal staff and Adobe InDesign for designers.

## Portrait Grid Rules

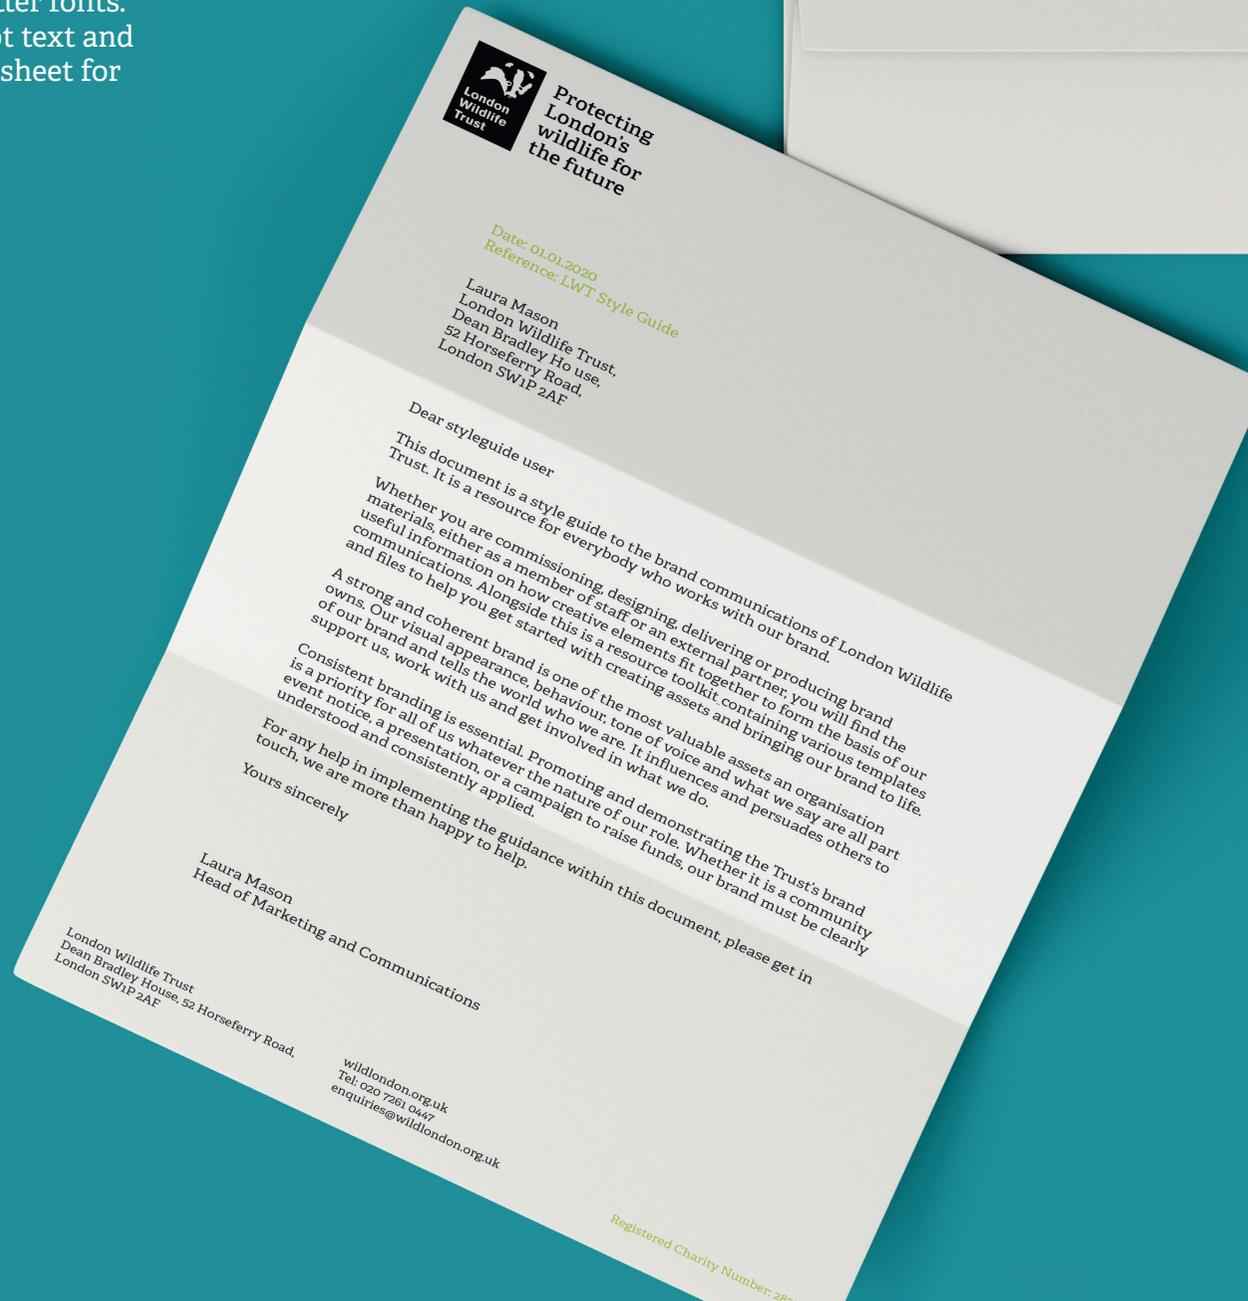

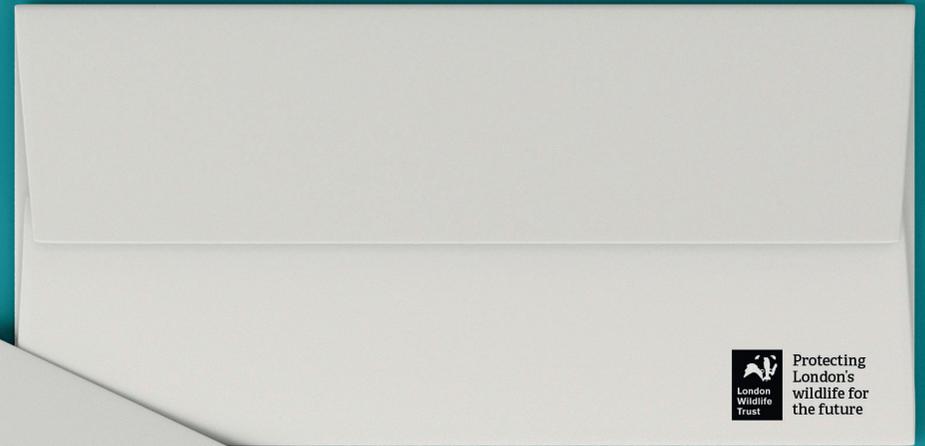

Columns	Margin	Gutter
3	20mm	12mm
4	15mm	8mm
6	10mm	4mm

**Letterhead**

# Headed Paper

A typeset letter has been created with both Adelle and Bitter fonts. It is set using 11pt on 13pt text and includes a continuation sheet for additional pages.

# **Presentations**

# A4 Grid Structure

There is a working file for A4 presentations, which is supplied in Microsoft PowerPoint and Apple Keynote..

It consists of 8 columns, and this style guide has been designed in accordance to it.

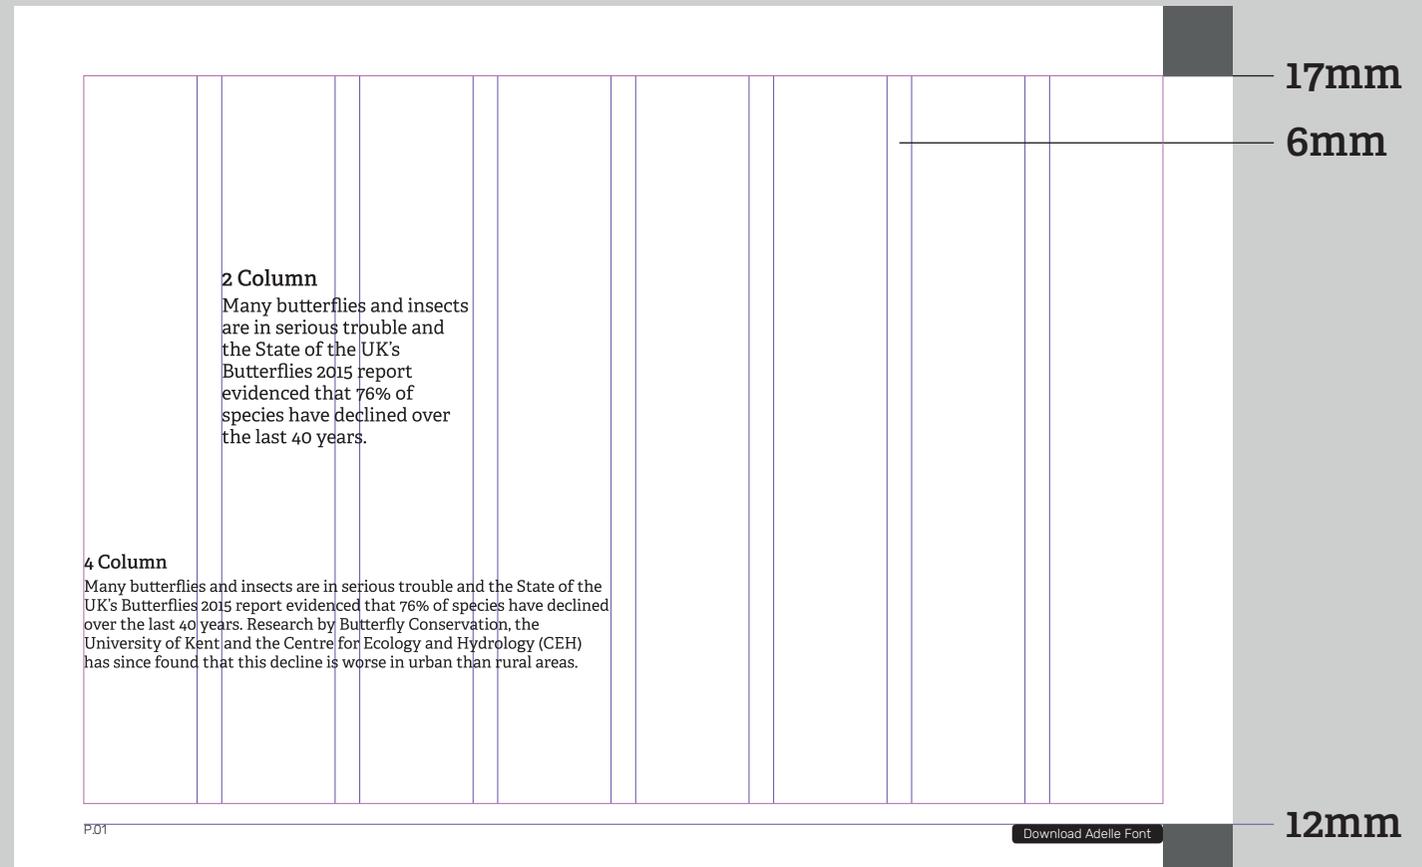

It contains 4 master slides for guidance:

1. Cover Page
2. Title Page
3. Content Page
4. Content Page - incl. illustration

However, this grid structure can accommodate a wide variety of layouts and designs by following the guidance within this style guide.

## Grid Rules

Margin	17mm	(48px)
Gutter	6mm	(17px)
Page margin	12mm	(34px)

# 16:9 On-Screen Grid Structure

There is an equivalent 16:9 version for on screen presentations, also supplied in Microsoft PowerPoint and Apple Keynote..

It contains 4 master slides for guidance:

1. Cover Page
2. Title Page
3. Content Page
4. Content Page - incl. illustration

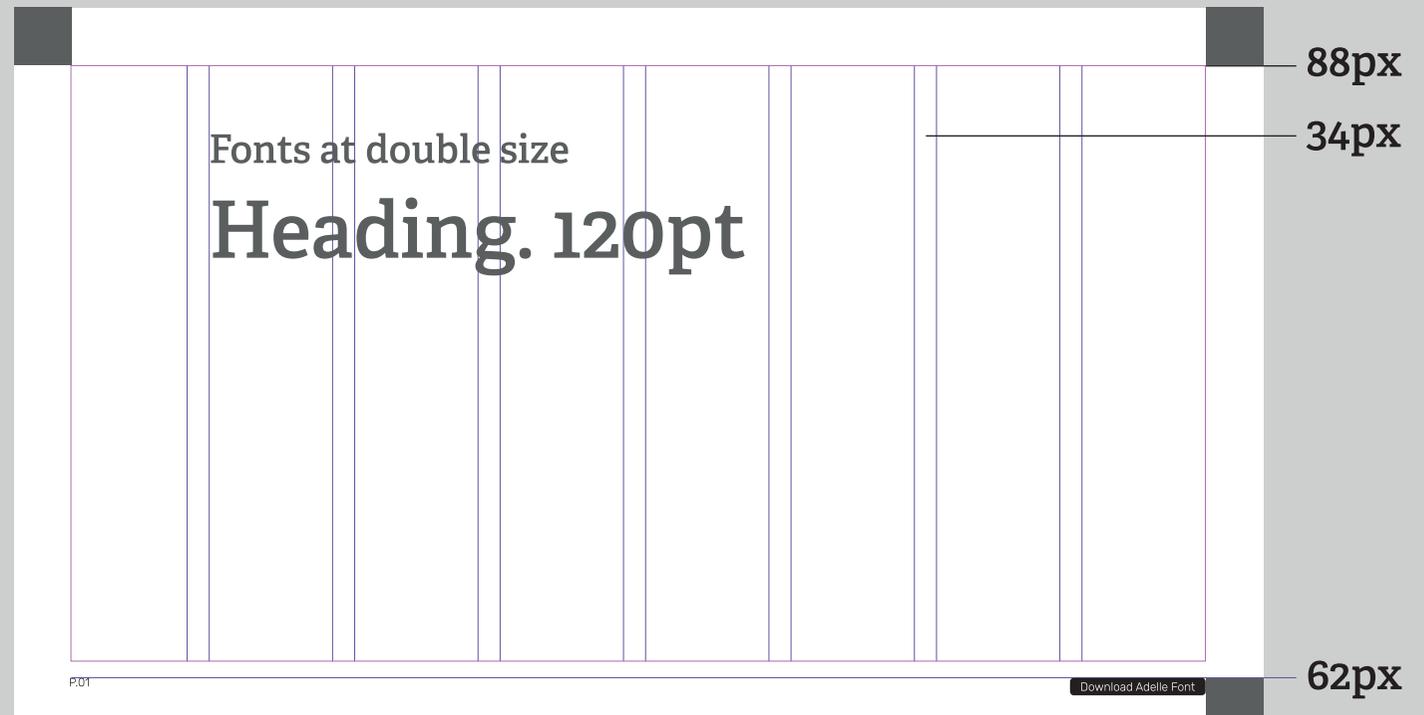

## Grid Rules

Margin 88px  
Gutter 34px  
Page margin 62px

### \*Note.

For 16:9 files, all fonts need to be double the sizes stated on page 22 of this guide.

Therefore a heading needs to be displayed at 120pt instead of 60pt and body copy is displayed at 22pt instead of 11pt.

# Thank you
